SAGITTARIUS

People born under this sign have great positive energy and are enthusiastic, loyal and intelligent; expansiveness and altruism are other easily noticeable characteristics, such as the spirit of adventure and the propensity for exploration and discovery through travel.

January 20 - February 18

AQUARIUS

Aquarius is original, independent, a dreamer, has a great need for freedom, sometimes even for solitude. Unpredictable, with a rather unstable balance, constantly projected forward, in need of novelty, he hates any form of constraint but can also be a very patient and understanding person.

March 21 - April 19

ARIES

Being a fire sign, Aries is instinctive, full of ardor and energy; he is courageous and spontaneous, but undisciplined. The boundless self-confidence will push him to take great risks. For him there are no loopholes and, often, not even the consequences. In fact, only impulse dominates it.

May 21 - June 21

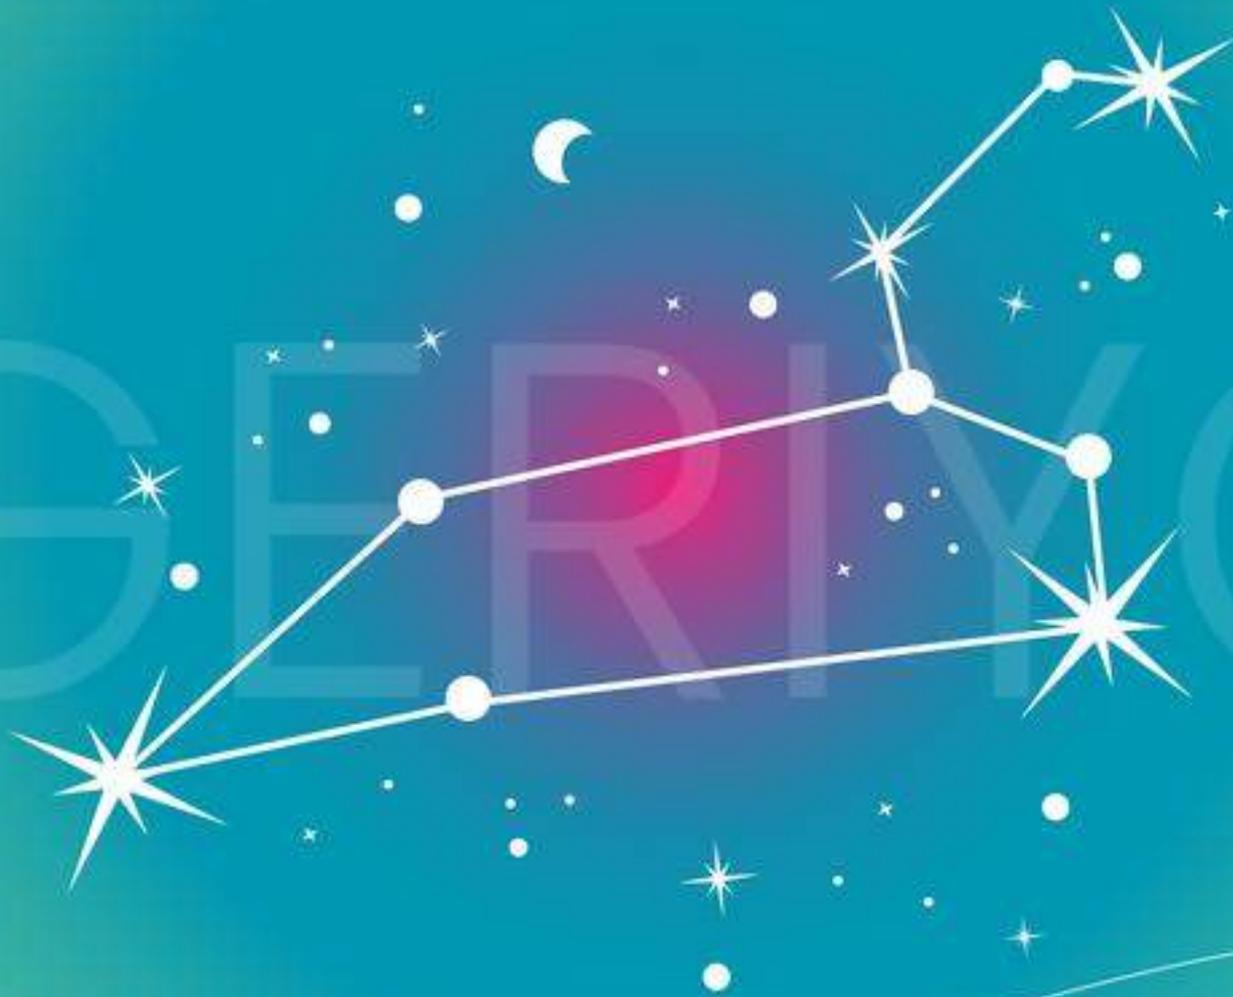

GEMINI

Of those born in Gemini, open-mindedness and communication skills are to be mentioned. They are usually described as smart, smart and with a double personality (in reference to the dual nature of the sign). They are also brought to contact with others, to curiosity and knowledge.

July 23 - August 22

LEO

Leo is extremely brave. However, he never takes risks just for the thrill that follows; in his generosity, he is simply always ready for self-sacrifice. Even in love, Leo is very generous. He hardly cheats, because he is very focused on himself and does not fall into small things.

September 22 - October 23

LIBRA

Libras are sociable, flexible and peaceful people: they shun violence and do not tolerate rudeness. They also love to keep fit and spend a lot of time taking care of their beauty. This sign is the most elegant and refined of the zodiac, endowed with a spirit of adaptation and empathy.
