The Statue of Liberty. New-York 1886

Statue material

350 copper plates about 3/32 inch thick riveted together, fixed on an exterior iron armature linked to the primary triangulated framework

Pedestal material

Portland-cement covered massive concrete structure. It has concrete walls 20 feet thick and contains the statue's great anchorage.

'Liberty Enlightening the World'
The Statue of Liberty Enlightening the World

This gigantic statue that measures 111 feet high (44 metres) was created by Auguste Bartholdi and offered to the United States from France and placed at the entrance of New York's harbor.
It was built in France from 1875 to 1884 on the workshop of Gustave Goussier and C^o. The framework was constructed by Gustave Eiffel. The statue was then taken down, boxed and shipped to New York on board the steamer 'Liberty'.
The statue arrived in New York on the 19th of June 1885. The pedestal was built by the American architect Richard Morris Hunt and General Charles Pinney Smith, US army engineer.
The monument was inaugurated on the 27th of October 1886.

VINTAGE LIFE

The essence of vintage art is its ability to capture a moment in time, a feeling, a story. It is a collection of memories, a window into the past, a celebration of the art that has shaped our world. From the masterpieces of the Renaissance to the bold, expressive works of the modern era, vintage art offers a unique perspective on the human experience. It is a treasure trove of inspiration, a source of joy, and a testament to the enduring power of the creative spirit.
